WORK EXPERIENCE

Ropstam Solutions Inc.

Jan. 2024 – Present

Software Engineer

Remote

- Developed a C-level business management platform using React, Node.js, and MongoDB, enabling executives to manage projects, teams, KPIs, and financial performance in a centralized dashboard. Implemented role-based access control, real-time data visualization, advanced reporting, and strategic planning modules. Focused on scalability, performance, and enterprise-grade security.
- Developed a full-stack subscription management system using React, Node.js, and MongoDB. Implemented robust user authentication, authorization, and role-based access control—Integrated Stripe for payments and subscription lifecycle management
- Developed and maintained the Reventure real estate app, utilizing full-stack skills (React/NextJs, Python) for map integration, data engineering, and content management.
- Designed and developed pixel-perfect Parking platform admin panel UI using React, Node.js, Sass, and multiple API integrations.

Spot N Paste LLC

Jan. 2022 – Dec. 2023

JavaScript Developer

Remote

- Developed the company's browser extension in JavaScript, using AJAX calls and browser DOM APIs to help drop-shippers in their daily tasks.
- Engaged closely with clients at every application development stage, ensuring thorough comprehension of requirements, design, and continued application development and maintenance.

WebNukes Software House

Jan. 2020 – Dec. 2021

Software Engineer

Bahawalpur, Pakistan

- Managed full-stack development, including dashboards, while collaborating with clients and providing QA and customer support.
